## Handpiece Repair Services Include:

(Air-Powered or E-Type Connections)

### Warranty Tracking:

- Each time your Handpiece comes into Our Office, we Check its Repair History to see what has been Repaired and when Each Repair Expires.

### Assessment of Your Handpiece:

- We test the Chuck Holding Strength, looking for 5 lbs. of Pull Force on loose burs or hard-to-seat burs.
- We test the Functionality of the Bearings for Vibration, Chattering Burs, and Heat.
- We test the Air & Water Lines for Any Leaks or Clogs.
- We also Check the Handpiece Shell for any Visible Shell Damage.

### Repairing Your Handpiece:

- We Disassemble your Handpiece.
- Depending on the Quoted Repairs, we will Clean the Sub-Assembly, including the Spindle, Chuck and Impeller.
- We will Clean the Internal Parts of the Handpiece, including the Head & Body, using an Ultrasonic Cleaner when needed.
- We will then Repair or Replace the Parts as Quoted.
- Lastly, we will then Reassemble your Handpiece.

### Repaired Handpiece Assessment Test:

- We perform a Chuck Holding Test, checking for 5 lbs. of Pull and Over.
- Then a Bearing Function Test checking for No Vibration, No Chattering, No Heat.
- Then an Air & Water Line Function Test is conducted to check for No Leaks and No Clogs and ensure the Air & Water are functioning well.
- Lastly, we then Lubricate your Handpiece.

### Repair Warranties:

- We give a 6 Month Warranty on Parts Installed. Exemptions are Screws, O-rings, or any part of that nature.
- All Services Do Not Come with a Warranty. These include All Cleaning, Adjusting, lubricating, and testing of your Handpieces. Accessories are also Not Included in the Repair Warranty.
- Repair Warranty Expiry Dates are located on your Invoice, Underneath each Handpiece Listing.
